

24 May 2024

The Public Investment Corporation (PIC) invests funds on behalf of public sector entities including the Government Employees Pension Fund. The organisation is the largest investment manager in the country and the continent. Applications are invited from dynamic individuals for the following challenging position:

Position: DevOps Engineer

Job Grade: D1- D3

(Ref: UDOE02)

Salary: All-inclusive remuneration package negotiable

Centre: Public Investment Corporation, Pretoria

Requirements:

- Bachelor's Degree in Computer Science, Information Technology, Information Systems or similar.
- Must have Agile development certification (Scrum).
- Preferred certifications in Microsoft solutions such as Azure and Power Platform
- 4 -5 years of working experience with application development and support.
- Proficiency in one or more coding languages (e.g. AS, HTML 5, C#, .NET, Web, Java, XML, JavaScript, CSS and Python).
- Experience with CI/CD tools and development platforms (e.g., Azure DevOps, GitHub, Jenkins, CircleCi, Docker, GitLab, Kubernetes).
- Experience with Agile development and a strong understanding of DevOps principles.

Duties:

- Streamline the software development lifecycle by identifying pain points and productivity barriers and determining ways to resolve them.
- Collaborate closely with development teams to understand their current build and release processes and make recommendations for improvement.
- Partner with cross-functional stakeholders, including development, operations, quality assurance, and security, to streamline processes.

- Guide development teams to improve the performance and operability of the solutions they develop.
- Build and maintain the CI/CD pipelines to improve developer productivity, agility, and code quality.
- Develop and continuously improve automation solutions (including testing) to enable teams to build and deploy code efficiently and consistently.
- Build automated testing to reduce manual effort and improve product quality.
- Ensure that systems meet business and customer needs for reliability and availability.
- Monitor and manage application performance and service quality, including initial troubleshooting, debugging, identification of root causes, and issue resolution.
- Work closely with cross-functional stakeholders to analyze and troubleshoot complex production issues.
- Prepare and present design and implementation documentation to multiple stakeholders.
- Research new tools and technologies and recommend ways to implement them.
- Promote DevOps principles and culture across the software engineering organization.

Competencies and skills:

- Advanced Analytical skills,
- Team player with solid time management,
- Good communication skills (written and oral)
- Good interpersonal and organisational skills
- Problem-solving abilities.

With the PIC having topped the R2 trillion marks in assets under management and in the process of entering the global investment market, it is the best asset manager any serious professional would want to be associated with. It is also one of the better places from which one can serve South Africa.

Closing Date: 31 May 2024

PIC is an equal opportunities employer.
